

- What Acme Corp's VP of Finance did to save 80+ hours/month

Hi [First Name],

Finance teams like yours are under more pressure than ever — faster closes, tighter forecasts, more visibility.

But if your team is still buried in spreadsheets and waiting on reports, you're already at a disadvantage.

That's why enterprise finance leaders are moving to **QuortixIQ** — an AI-powered analytics platform designed specifically for CFOs and their teams.

It integrates with your ERP and Excel workflows, and gives you:

- Real-time dashboards across business units
- AI-driven forecasts with better accuracy
- Smart alerts for budget risk and variance
- Month-end closes in days, not weeks

One of our clients, Acme Corp, reduced reporting time by 80% in under 30 days:

"What used to take two weeks now takes two hours."

— Dana Wells, VP of Finance, Acme Corp

If you're curious what that kind of speed and foresight could look like for your team, I'd be happy to show you a quick demo.

Want to take a look?

Best,

[Your Name]
